

Capital Rx Maintenance Medication List

Effective July 1, 2025

Maintenance medications are prescription drugs commonly used to treat chronic, long-term conditions such as diabetes, high blood pressure or asthma. These conditions typically require regular, daily use of medications. Below is a list of maintenance medications. Depending on your benefit, you may be eligible to receive a 90-day supply of covered maintenance medications through mail-order or at select retail pharmacies. Select plan benefits may require you to fill these medications through home delivery or at select retail pharmacies to receive coverage. Please note, this list is not inclusive of all maintenance medications and is subject to change. This list is for informational purposes and should not be relied upon to determine coverage.

Coverage is always subject to the terms and limits of your benefit plan. For more details about your benefits, please visit cap-rx.com/member-tools to view a complete list of formulary medications, and if there are any questions about your particular prescription drug benefits, please contact customer service at the toll-free member phone number on your ID card.

Please note:

- The drugs in each category are shown alphabetically on the following pages.
- Generic products are listed in lowercase.
- Brand name products are CAPITALIZED.
- Some strengths and/or formulations may not be covered.
